

Trust the cloud you build

HPE Helion OpenStack®

With HPE Helion OpenStack®, you have the most open, configurable and secure cloud infrastructure to support your business stakeholder demands and provide a modern, agile development experience for your developers.

Deliver a great operational experience for your OpenStack™ cloud

Policy-define your private cloud with enterprise-grade security capabilities

A high degree of control over your IT environment, while preserving business agility

Open source alternative for expensive & vendor-locked solutions: choose your own mix of technology or hardware providers

The most comprehensive global support, professional services, and training programs for your heterogeneous enterprise environments

Trust the Cloud You Build

Build Your World-Class, Private Cloud on Open Technology

When the applications you deploy need to connect to sensitive information that lives on the most protected parts of your datacenter, you need to be laser-focused in how you define the policy of your private cloud. You embrace open standards because they give you the most options for integrations with current networking structure, with security rules, and with the wide range of enterprise vendors for software and hardware.

60 days:
from design to at-scale production

"By partnering with HPE, we were able to quickly design, develop and integrate a new product based on of full automation, virtualized production and fast time to service."

John de Keijzer
Head of Development, Swisscom

HPE Helion OpenStack offers the freedom to use the hardware of your choice & integrate with your chosen vendors - Leverage existing investments by easily integrating with existing tools and HPE or non-HPE hardware. Our HPE Helion Technical Consulting Services helps roadmap, design and implement integrations with your datacenter services.

Accelerate Your Cloud Transformation - Our most successful customers have partnered with HPE to accelerate their transformation to hybrid cloud and receive the datacenter expertise and access to the global support & services to get up and running quickly.

Security & Control While Preserving IT Agility

Benefit from HPE's long-running experience running some of the world's most complex and secure data centers, running the world's most trusted workloads.

Data Centric Security

Your data is encrypted at rest and in transit: you define the policy for who has access, and, HPE enables you to encrypt communications between API endpoints using TLS.

Infrastructure Hardening

Linux for HPE Helion provides an end-to-end solution for customer and reduces the attack surface through proactive security management. The HPE team tests and hardens HPE Helion OpenStack in enterprise security environment, so you can operate your private cloud with confidence.

Monitor, Detect, Respond

We integrate seamlessly with HPE ArcSight to provide real-time security monitoring of the infrastructure hardware including servers, storage, routers, and switches..

Continuous Regulatory Compliance

HPE contributes its knowledge of operating OpenStack technology at scale to assist the community in the engagement and definition of key security issues, including the founding of open groups to promote and lead OpenStack security efforts.

Related Products & Services

HPE Helion CloudSystem

HPE Helion CloudSystem is an open, fully integrated, hybrid cloud solution with native world class IaaS and PaaS features. Our end-to-end factory built hybrid cloud solution is ideal for running traditional and cloud-native workloads, delivering automation and orchestration across multiple private and public clouds and your traditional infrastructure. HPE Helion CloudSystem redefines how you build and manage hybrid cloud services.
